

Product based PO Collaboration with Streamwork

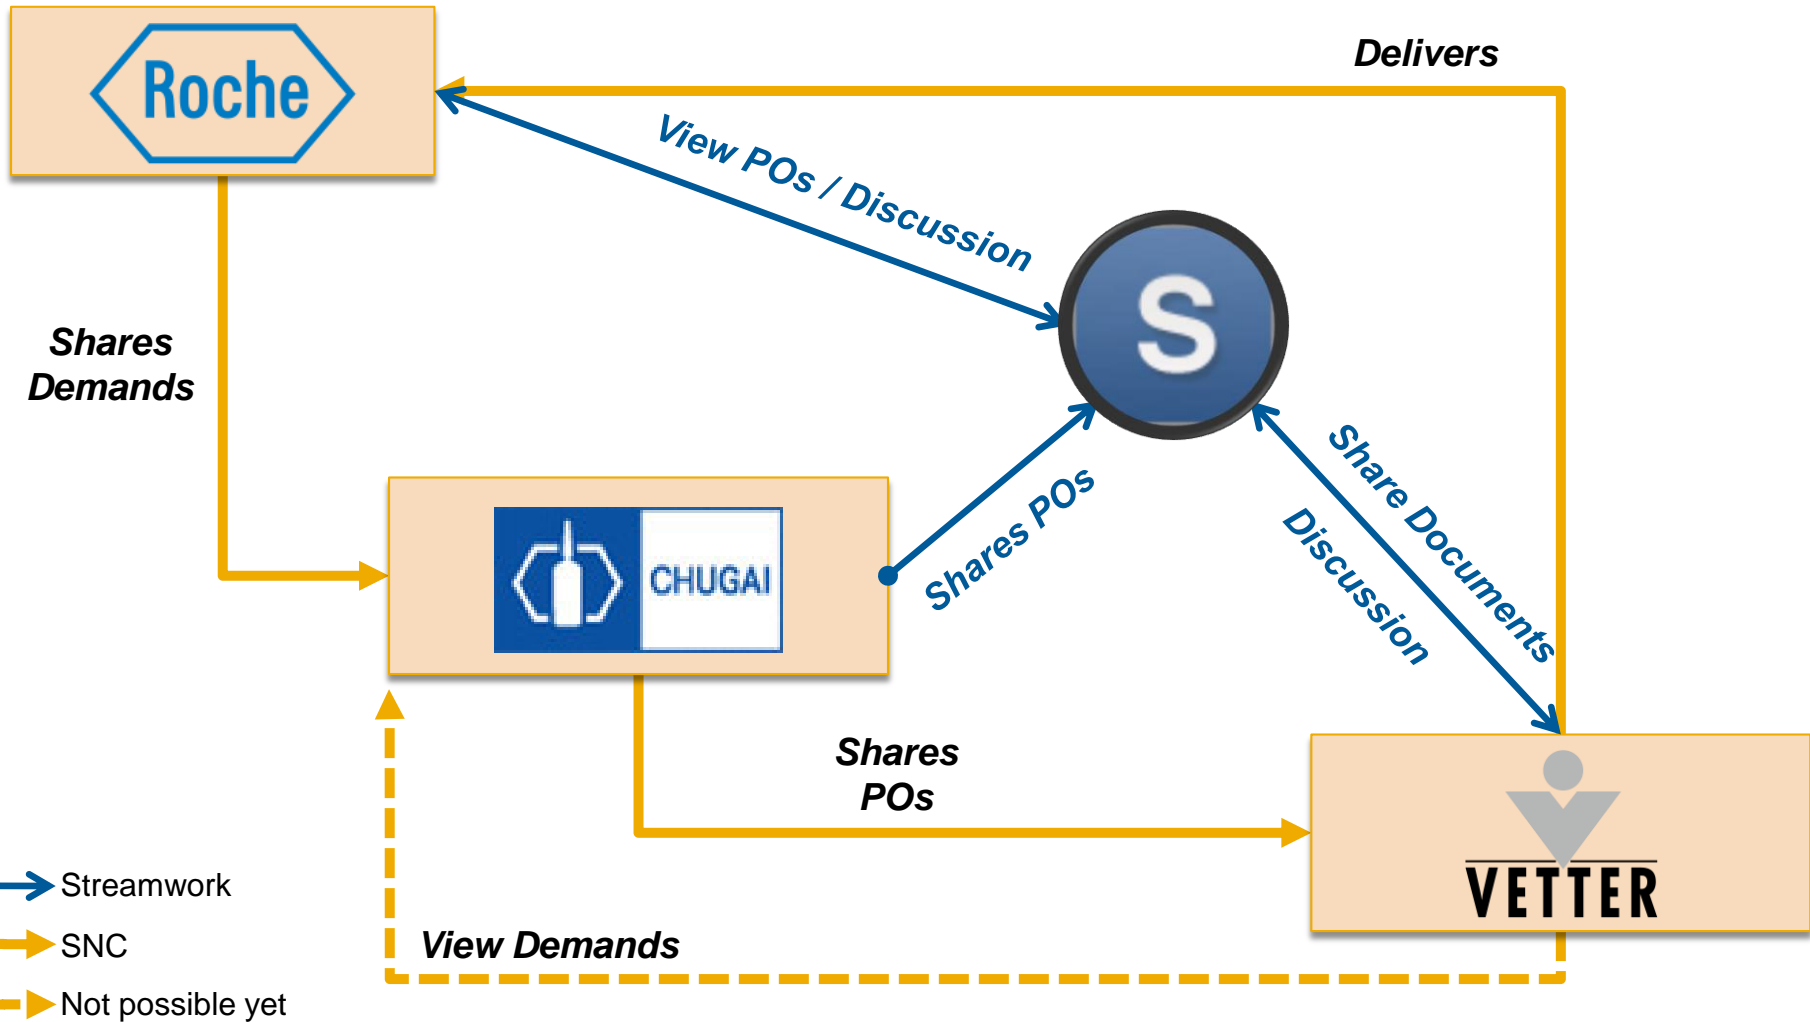

Christian Butzlaff, Michael Dell - 07/27/2011

Example Supply Chain

Example Supply Chain with Streamwork integration

Example Use Case

- ***Chugai* uses a product specific Streamwork activity in which they have invited *Roche* and *Vetter***
 1. Roche shares their demands with Chugai
 2. Chugai sends their POs to Vetter
 3. Vetter is not able to provide the requested packing material and therefore suggests an alternative packing material in the SW discussion board
 4. Vetter uploads a technical specification of the new material to SW and links the file to the discussion
 5. Chugai and Roche decide that the new packing material is sufficient for them
 6. Vetter confirms the POs directly in Streamwork – Roche can follow the status of the POs in Streamwork
 7. Vetter invites their forwarding agent so he gets the information about the new packing material as well
